Reason for the Questionnaires

Our firm has been selected to perform a security assessment of your organization. The attached questionnaires will be used, in part, to assist in gaining an understanding of your internal control systems.

How to Complete the Questionnaires

Distribute each section individually to the person or persons you deem most capable of answering the questions in that particular section. For security purposes, DO NOT forward the entire set of questionnaires for completion by a succession of individuals. Each Point of Contact should see only the section(s) applicable to their area of expertise.

For each section to be completed, have the responsible individual read each question and respond appropriately by placing an "X" in the corresponding column or by providing the requested information. If any question is unclear or if you are unsure about an answer, please discuss the question with a member of the audit team when they arrive on site.

Returning the Completed Questionnaire

Please return the questionnaires with all sections completed (and all requested information) to the auditor in charge on the day the auditors arrive on site.

Follow-up by Auditors

Our auditors will review the completed questionnaire and will contact you if they have additional questions or if you have indicated uncertainty about how a question should be answered.
