Workstation Administration and Configuration: Windows 8.1 systems

INSTRUCTIONS:

Please respond to each question by placing an "X" in the "Yes", "No" or "N/A" column or by providing the information requested. Use the "Tab" key to move between items. Use the "Additional information" field for explanatory comments, or to clarify differences between answers for workstations of a similar type. If an item does not have an "Additional information" field, and you need to explain your answer, use the space at the end of the questionnaire and reference the item being explained, e.g. RE: Item 1.2-This is the explanation.

Source: This document is based on Level 1 requirements for Windows 8.1 Professional domain controllers and domain member workstations from the Center for Internet Security (CIS).

The CIS Scoring Tool is currently unavailable from CIS. When it becomes available, you may execute the tool on your Windows NT 4.0-based systems and provide electronic copies of the output to the Auditors instead of completing this questionnaire manually.

Contact number for follow-up questions: _____

Date Completed: _____

1. General

Number	Question	Yes	No	N/A
1.1	**If all Windows 8.1 Professional installations are joined to a Windows 2012 domain, please provide an electronic copy of the Default Domain Controller Policy and any additional domain controller policies for your network if these policies have not already been provided as part of the Server Administration and Configuration Questionnaire.** *To produce these policies, you may need to download and install the enhanced Group Policy Management Console (gpmc) from the Microsoft website at www.microsoft.com/downloads and search for gpmc. This tool may be installed on a Windows 8.1 desktop and run from that location if the Administrator does not wish to run the tool directly on a Windows 8.1 Professional server.* Additional information:			

Number	Question	Yes	No	N/A
1.2	**If all Windows 8.1 Professional installations are joined to a Windows 2012 domain, please provide an electronic copy of the Default Domain Policy and any additional domain policies for your network if these policies have not already been provided as part of the Server Administration and Configuration Questionnaire.** *To produce these policies, you may need to download and install the enhanced Group Policy Management Console (gpmc) from the Microsoft website at www.microsoft.com/downloads and search for gpmc.* Additional information:			
1.3	**Please provide an electronic copy of the Local Security Policy for all Windows 8.1 Professional installations on your network that are NOT joined to a domain.** Additional information:			

2. Service Packs and Hotfixes

Number	Question	Yes	No	NA
		Status Setting		
2.1	Has the latest service pack been applied to all Windows 8.1 Professional workstations? Additional information:	☐	☐	☐
2.2	Have all vendor recommended Hotfix roll-ups been applied to all Windows 8.1 Professional workstations? Additional information:	☐	☐	☐

N/A	**Are all Windows 8.1 Professional installations joined to a Windows 2012 Active Directory domain?** ***If you answered "Yes" to this question, skip to Section 5, Additional Security Settings. If one or more machines running Windows 2000 Professional are NOT joined to a Windows 2000 or 2003 domain, complete the remainder of this questionnaire for those machines only. Use the Additional information box below to list the machine names of any Windows 8.1 Professional installation NOT joined to a domain.*** **Additional information:**	☐	☐	☐

3. Auditing and Account Policies

Number	Question	Yes	No	NA
		Status		
		Setting		
3.1	**Auditing Policies**			
3.1.1	Is an audit policy configured on all Windows 8.1 Professional workstations? *If none of your XP Professional workstations have an auditing policy configured, skip to Section 3.2, Password Policies. Do not complete the rest of this section.* Additional information: _____	☐	☐	☐
3.1.2	What setting has been applied to "Audit Account Logon Events": Additional information: _____			
3.1.3	What setting has been applied to "Audit Account Management": Additional information: _____			
3.1.4	What setting has been applied to "Directory Service Access": Additional information: _____			
3.1.5	What setting has been applied to "Audit Logon Events": Additional information: _____			
3.1.6	What setting has been applied to "Audit Object Access": Additional information: _____			
3.1.7	What setting has been applied to "Audit Policy Change": Additional information: _____			
3.1.8	What setting has been applied to "Audit Privilege Use": Additional information: _____			
3.1.9	What setting has been applied to "Audit Process Tracking": Additional information: _____			
3.1.10	What setting has been applied to "Audit System Events": Additional information: _____			
3.2	**Password Policies**			
3.2.1	What setting has been applied to "Minimum Password Length": Additional information: _____			

3.2.2	What setting has been applied to "Maximum Password Age": Additional information:	
3.2.3	What setting has been applied to "Minimum Password Age": Additional information:	
3.2.4	What setting has been applied to "Password must meet complexity requirements": Additional information:	
3.2.5	What setting has been applied to "Enforce password history?": Additional information:	
3.2.6	What setting has been applied to "Store password using reversible encryption": Additional information:	
3.3	**Account Lockout Policies**	
3.3.1	What setting has been applied to "Account lockout duration": Additional information:	
3.3.2	What setting has been applied to "Account lockout threshold": Additional information:	
3.3.3	What setting has been applied to "Reset account lockout counter after": Additional information:	
3.4	**Event Log Settings**	
3.4.1	What setting has been applied to "Maximum application log size": Additional information:	
3.4.2	What setting has been applied to "Maximum security log size": Additional information:	
3.4.3	What setting has been applied to "Maximum system log size": Additional information:	
3.4.4	What setting has been applied to "Prevent local guests group from accessing application log": Additional information:	
3.4.5	What setting has been applied to "Prevent local guests group from accessing security log": Additional information:	
3.4.6	What setting has been applied to "Prevent local guests group from accessing system log": Additional information:	

3.4.7	What setting has been applied to "Retention method for application log": Additional information:	
3.4.8	What setting has been applied to "Retention method for security log": Additional information:	
3.4.9	What setting has been applied to "Retention method for system log": Additional information:	

4. Security Settings

Number	Question	Yes / No / NA Status Setting
4.1	**Major Security Settings**	
4.1.1	What setting has been applied to "Network access: Allow anonymous SID/Name translation": Additional information:	
4.1.2	What setting has been applied to "Network Access: Do not allow anonymous enumeration of SAM accounts": Additional information:	
4.1.3	What setting has been applied to "Network Access: Do not allow anonymous enumeration of SAM accounts and shares": Additional information:	
4.2	**Minor Security Settings**	
4.2.1	What setting has been applied to "Accounts: Administrator account status": Additional information:	
4.2.2	What setting has been applied to "Accounts: Guest account status": Additional information:	
4.2.3	What setting has been applied to "Accounts: Limit local account use of blank passwords to console logon only": Additional information:	
4.2.4	What setting has been applied to "Accounts: Rename administrator account": Additional information:	

4.2.5	What setting has been applied to "Accounts: Rename guest account": Additional information:	
4.2.6	What setting has been applied to "Accounts: Audit the access of global system objects": Additional information:	
4.2.7	What setting has been applied to "Accounts: Audit the use of Backup and Restore privilege": Additional information:	
4.2.8	What setting has been applied to "Accounts: Shut down system immediately if unable to log security audits": Additional information:	
4.2.9	What setting has been applied to "Devices: Allow undock without having to log on": Additional information:	
4.2.10	What setting has been applied to "Devices: Allowed to format and eject removable media": Additional information:	
4.2.11	What setting has been applied to "Devices: prevent users from installing printer drivers": Additional information:	
4.2.12	What setting has been applied to "Devices: Restrict CD-ROM access to locally logged-on user only": Additional information:	
4.2.13	What setting has been applied to "Devices: Restrict floppy access to locally logged-on user only": Additional information:	
4.2.14	What setting has been applied to "Devices: Unsigned driver installation behavior": Additional information:	
4.2.18	What setting has been applied to "Domain member: Digitally encrypt or sign secure channel data (Always)": Additional information:	
4.2.19	What setting has been applied to "Domain member: Digitally encrypt secure channel data (when possible)": Additional information:	
4.2.20	What setting has been applied to "Domain member: Digitally sign secure channel data (when possible)": Additional information:	
4.2.21	What setting has been applied to "Domain member: Disable machine account password changes": Additional information:	
4.2.22	What setting has been applied to "Domain member: Maximum machine account password age" Additional information:	

Number	Question	Yes	No	NA
		Status		
		Setting		
4.2.23	What setting has been applied to "Domain member: Require strong (Windows 2000 or later) session key": Additional information:			
4.2.24	What setting has been applied to "Interactive logon: Do not display last user name": Additional information:			
4.2.25	What setting has been applied to "Interactive logon: Do not require CTRL+ALR+DEL": Additional information:			
4.2.26	What setting has been applied to "Interactive logon: Message text for users attempting to log on": Additional information:			
4.2.27	What setting has been applied to "Interactive logon: Message title for users attempting to log on": Additional information:			
4.2.28	What setting has been applied to "Interactive logon: Number of previous logons to cache (in case domain controller is not available)": Additional information:			
4.2.29	What setting has been applied to "Interactive logon: Prompt user to change password before expiration": Additional information:			
4.2.30	What setting has been applied to "Interactive logon: Require Domain Controller authentication to unlock workstation": Additional information:			
4.2.32	What setting has been applied to "Interactive logon: Smart card removal behavior": Additional information:			
4.2.33	What setting has been applied to "Microsoft network client: Digitally sign communications (always)": Additional information:			
4.2.34	What setting has been applied to "Microsoft network client: Digitally sign communications (if server agrees)": Additional information:			
4.2.35	What setting has been applied to "Microsoft network client: Send unencrypted password to third-party SMB workstations": Additional information:			
4.2.36	What setting has been applied to "Microsoft network server: Amount of idle time required before disconnecting session":			

Number	Question	Yes	No	NA
		Status Setting		
	Additional information:			
4.2.37	What setting has been applied to "Microsoft network server: Digitally sign communications (Always)": Additional information:			
4.2.38	What setting has been applied to "Microsoft network server: Digitally sign communications (if client agrees)": Additional information:			
4.2.39	What setting has been applied to "Microsoft network server: Disconnect clients when logon hours expire": Additional information:			
4.2.40	What setting has been applied to "Network access: Do not allow storage of credentials or .NET Passports for network authentication": Additional information:			
4.2.41	What setting has been applied to "Network access: Let Everyone permissions apply to anonymous users": Additional information:			
4.2.42	What setting has been applied to "Network access: Named Pipes that can be accessed anonymously": Additional information:			
4.2.43	What setting has been applied to "Network access: Remotely accessible registry paths": Additional information:			
4.2.46	What setting has been applied to "Network access: Shares that can be accessed anonymously": Additional information:			
4.2.47	What setting has been applied to "Network access: Sharing and security model for local accounts": Additional information:			
4.2.48	What setting has been applied to "Network security: Do not store LAN Manager hash value on next password change": Additional information:			
4.2.49	What setting has been applied to "Network security: Force logoff when logon hours expire": Additional information:			
4.2.50	What setting has been applied to "Network security: LAN Manager authentication level": Additional information:			
4.2.51	What setting has been applied to "Network security: LDAP client signing requirements":			

Number	Question	Yes / No / NA Status Setting
	Additional information:	
4.2.52	What setting has been applied to "Network security: Minimum session security for NTLM SSP based (including secure RPC) clients": Additional information:	☐ Require integrity ☐ Require confidentiality ☐ Require NTLMV2 ☐ Require 128-bit
4.2.53	What setting has been applied to "Network security: Minimum session security for NTLM SSP based (including secure RPC) clients": Additional information:	☐ Require integrity ☐ Require confidentiality ☐ Require NTLMV2 ☐ Require 128-bit
4.2.54	What setting has been applied to "Recovery console: Allow automatic administrative logon": Additional information:	
4.2.55	What setting has been applied to "Recovery console: Allow floppy copy and access to all drives and all folders": Additional information:	
4.2.56	What setting has been applied to "Shutdown: Allow system to be shutdown without having to log on": Additional information:	
4.2.57	What setting has been applied to "Recovery console: Clear virtual memory pagefile": Additional information:	
4.2.59	What setting has been applied to "System cryptography: Use FIPS compliant algorithms for encryption, hashing and signing": Additional information:	
4.2.60	What setting has been applied to "System objects: Default owner for objects created by members of the Administrators group": Additional information:	
4.2.61	What setting has been applied to "System objects: Require case insensitivity for non-Windows subsystems": Additional information:	
4.2.62	What setting has been applied to "System objects: Strengthen default permissions of internal system objects (e.g. Symbolic Links)":	

Number	Question	Yes / No / NA Status Setting
	Additional information: _____	

5. Additional Security Protection

Number	Question	Yes / No / NA Status Setting
5.1	**Available Services**	
5.1.1	**Please provide an electronic copy of a screenshot from Computer Management | Services showing all installed services, their status, their startup type and logon account for a representative sample of XP Professional workstations joined to the domain and for ALL Windows XP Professional workstations NOT joined to a domain.**. Additional information: _____	
5.2	**User Rights**	
5.1.1	**The default domain controllers policy and default domain policies requested in questions 1.1.1 and 1.1.2 contain information sufficient to perform these tests for Windows XP Professional workstations joined to a domain. Please provide a copy of the Local Security Policy for ALL Windows XP Professional workstations NOT joined to a domain**.. Additional information: _____	

6. Consolidated Request List

Number	Requested Item	Provided	Not Provided	Reason not provided
6.1	Electronic copy of the Default Domain Controller Policy and any additional domain controller policies for your network.	☐	☐	_____
6.2	Electronic copy of the Default Domain Policy and any additional domain policies for your network.	☐	☐	_____
6.3	Electronic copy of the Local Security Policy for all stand-alone XP Professional workstations on your network.	☐	☐	_____
6.4	Electronic copy of a screenshot from Computer Management | Services showing all	☐	☐	_____

Number	Requested Item	Provided	Not Provided	Reason not provided
	installed services, their status, their startup type and logon account for all Windows 8.1 Professional workstations and the same information for a representative sample of Windows 8.1 Professional workstations joined to a domain.			

7. Additional Information for the Auditor on Windows 8.1 Professional Systems
