Master List of Requested Documents
(Provided By Client [PBC] List)

INSTRUCTIONS:

This document requests items we will need to begin our work for your organization. It is not a complete list and additional documentation may be requested during and after the on-site portion of our work has been completed. As the designated Point of Contact, this document will assist you in tracking the status of requested documents.

Please provide a DVD-ROM/USB Flash Drive containing copies of the requested documents to the auditing team upon their arrival at your organization. Annotate the names of the electronic documents with the request ID that the document satisfies. For example: If Request ID "1" will be satisfied by a document called "Our AV Program", then the electronic document would be named "1-Our AV Program." If more than one document will be used to satisfy the request, add a suffix to the request ID. For example: If item 4 is satisfied by three documents, "AV Configuration-LAN", "AV Configuration-Branches" and "AV Configuration-Admin Offices", the documents would be labeled "4-1-AV Configuration-LAN", "4-2-AV Configuration-Branches" and "4-3-AV Configuration-Admin Offices." If any requested documents are not available in electronic format, please provide a hard copy of the document, annotated using the identification scheme described above.

For each document requested and provided, place an "X" in the "Provided" column and enter the media type in which the requested item has been provided. If the document cannot be provided, place an "X" in the "Not provided" column and explain the reason why in the "Reason not provided" column.

The "X-Ref" column is used by the audit team to cross-reference requested documents to the various Internal Control Questionnaires provided to you separately. If you are unsure about what is being requested, you may find an answer by using the cross reference. A glossary of abbreviations used in the "X-Ref" column is located at the end of this request list. If you are still unsure, please call a member of the auditing team at _____. Use the "Tab" key to move between items or use the mouse cursor. Use the "Additional information" area at the end of the request list for additional explanatory comments, if necessary.
